Re: Hilary Harrison

To Whom It May Concern:

It is a pleasure to write this letter of support and recommendation for Hilary Harrison – a gifted and visionary artist. Hilary created a custom stained glass installation, titled *We Are Nature*, for the Mass General / Newton-Wellesley Foot & Ankle Center. The piece is the focal point of our Center and creates a warm and inviting atmosphere for patients and their families that visit the center each day. In fact, amongst an array of artwork integrated into the Center, we receive the highest number of compliments on the piece and inquiries about the artist. Hilary's piece has literally transformed the patient care environment and we are incredibly grateful to her for the time and dedication that she poured into this work of art. This piece of art will live on as part of the Massachusetts General Hospital for years to come.

In addition to her artistic talents, Hilary is highly organized, detailed and innovative. She collaborated with us every step of the way, through space construction and finishing work, to ensure that the piece was installed to perfection. I highly encourage individuals contemplating a complex installation or challenging piece to work with Hilary – you will be thrilled with what she delivers.

Should you have any questions about Hilary Harrison or wish to set up a time to view the piece please do not hesitate to contact me.

Sincerely,

Lauren Hoogendyk
